
Option 1 Update Instructions:

We only offer option 1 updates for PartnerPak Studio. Glazier Studio must run Option 3 to update software.

Option 1 Update – Use this version if you want to upgrade the software to the latest version and don't have any projects or data that you want to save. All databases will be replaced with clean versions.

Download the file from the website:

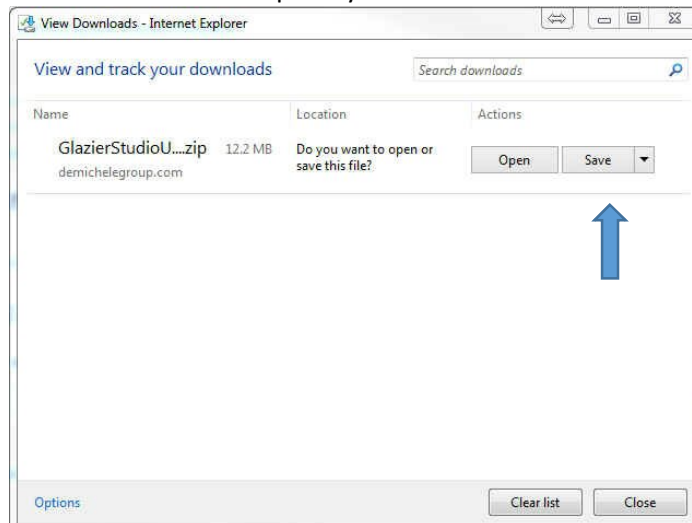

www.demichelegroup.com/ppakstudiodownload

1. Save the file:
2. Open the file.

How do I find the file I just downloaded?

Internet Explorer or Edge Browser

- i. Select the Download option you want.

- ii. Select save.
- iii. Select Open
- iv. Follow unzip instructions below.

Google Chrome

- i. Select the Download option you want.

HELP: Which Option should I choose?
 This update will merge changes from the update into your current databases, no project or custom components will be lost during this update. You must have version 5.0.0.88 or newer to use this update. **This is the recommended update option.** To use this update, download the update. Extract the files, then run update.exe to install.

OPTION 2 UPDATE 5.0.0.32
 Posted 4/29/16

Option 2 Update
