Glazier Studio 5.0.0.76 Update Release Notes

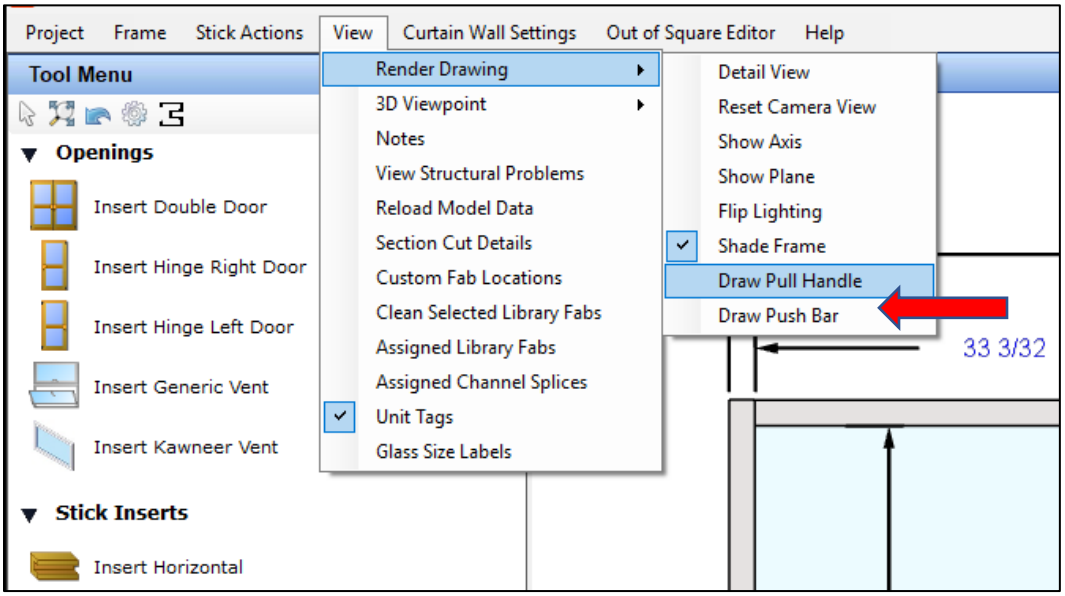

➢ General Program Features

1. Added the ability to reorder the list of frames in the project. Open the project to the frame list and right click on the list of frames and select “REORDER LIST.” Then you can drag the frames up into the correct order.

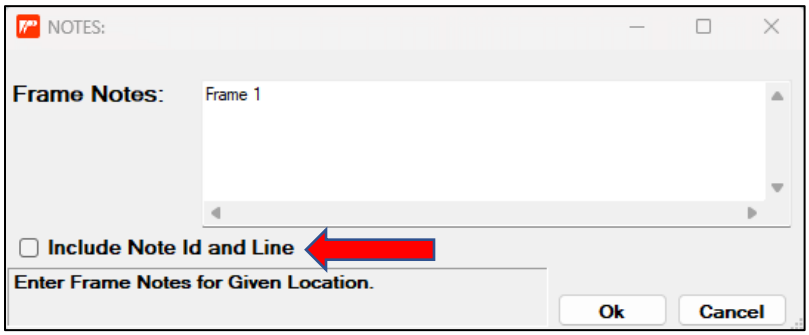

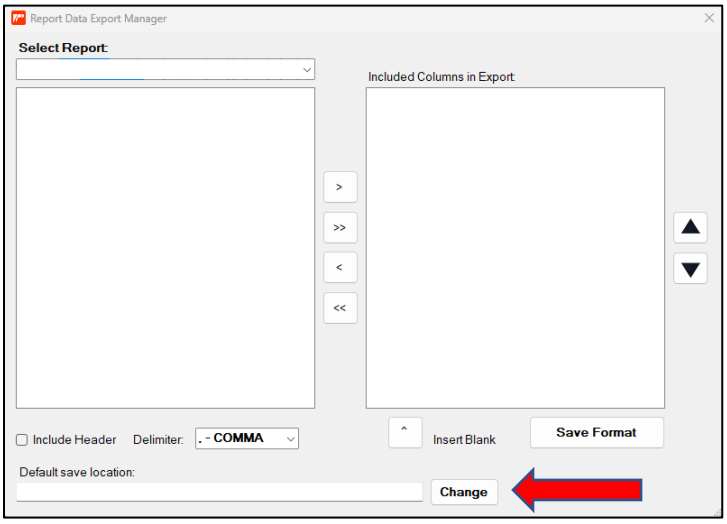

2. Added the ability to turn off or on the drawing of the pull handle and push bar on the doors. You can do this for all future doors or just a frame at a time.

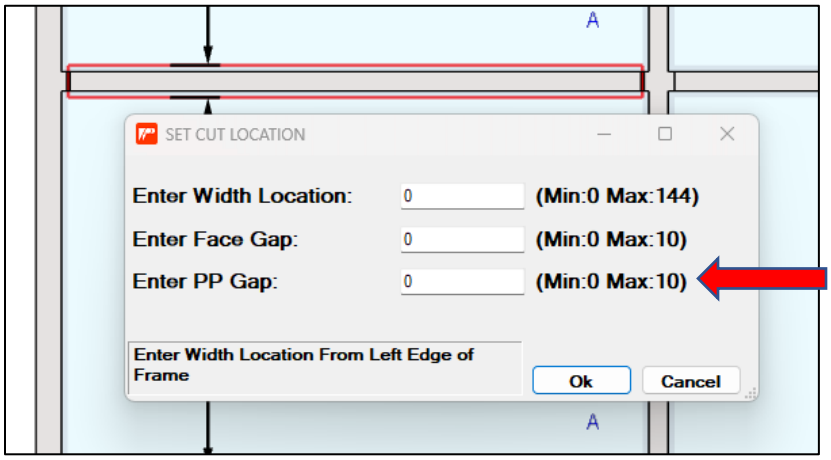

3. When adding Notes to a frame you now have the option to turn off the Note ID and Line. This gives you the ability to add a note anywhere on the frame not associated with a stick or piece of glass.

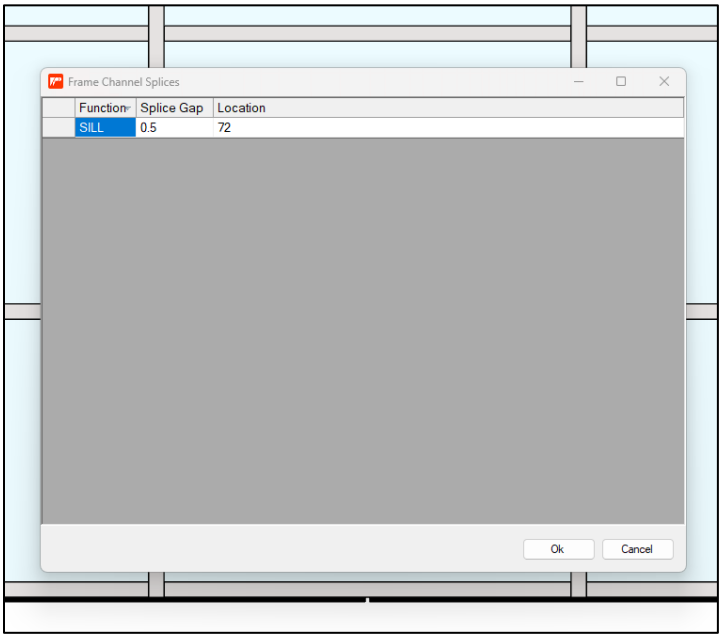

4. For any of the DATA EXPORTS you can define the Default Save Location for those files in the TOOLS | OPTIONS | DATA EXPORT MANAGER.

5. When applying a CUT GAP to a face member you can also define the gap to the pressure plate.

6. Added the option to review the added channel splices. On a frame that you manually add channel splices to go to VIEW | ASSIGNED CHANNEL SPLICES. You can adjust the splices here without removing the splice and re-adding it now.

7. Added door and door frame options to the Trulite catalog. Update all pricing and added new metal systems to the database.

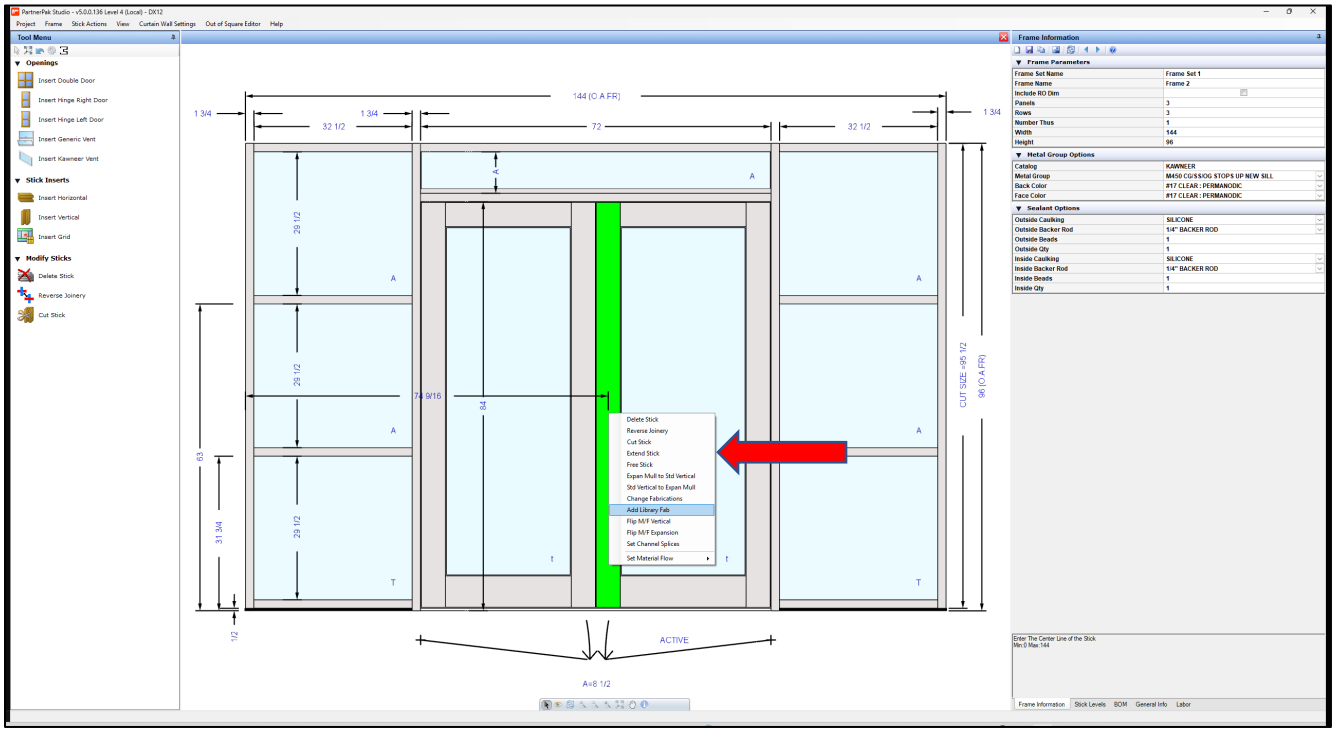

8. Database changes to the following:
    a. Alumicor – New 2900 Systems
    b. Arcadia – New Systems, Updated Pricing
    c. Boyd – New B350 B425 B450 B450N Systems
    d. Coral – New FL600UT System
    e. EFCO – New 5600 System
    f. Old Castle – New Reliance TC System
    g. Tubelite – 14000 WZ3 parts

9. The Atlas Architectural Metals, Inc. database is available. Call in and ask for it to be added to your Glazier Studio.

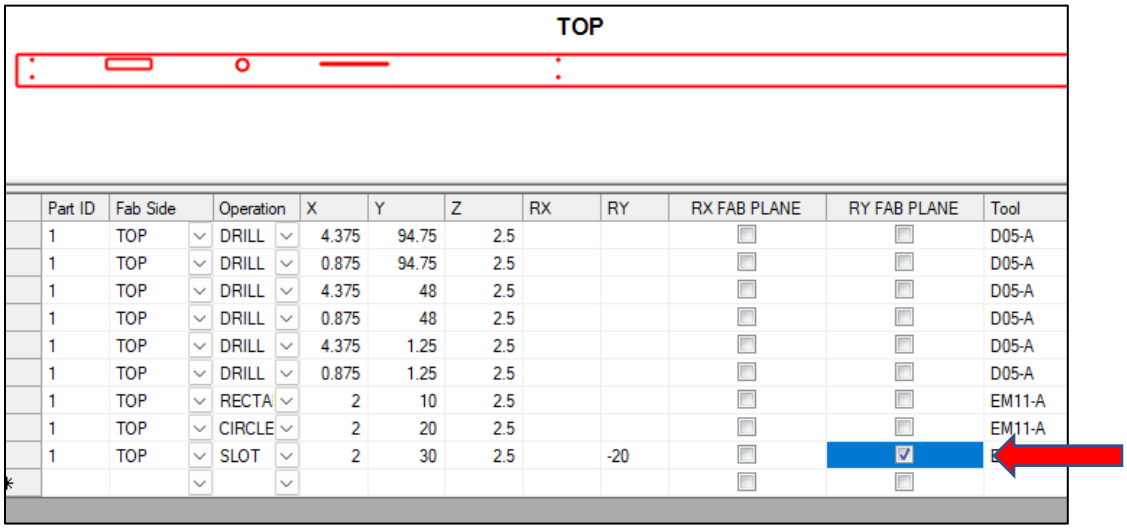

ATLAS
ARCHITECTURAL METALS INC.

➢ Metal/Door/Glass Fabrication Features

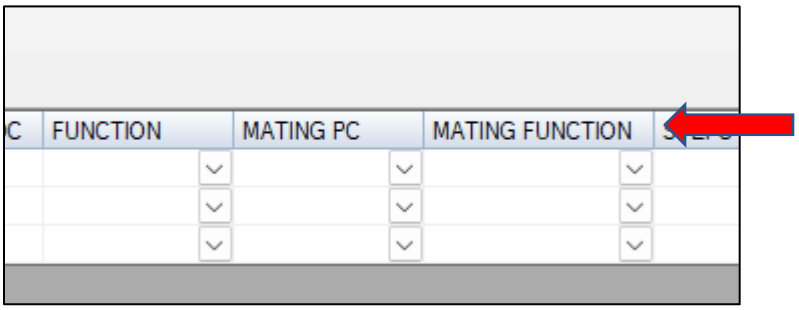

1. Added the option to add library fabs to a door in the elevation builder to apply for fabrication. Right Click on the door member and select ADD LIBRARY FAB.

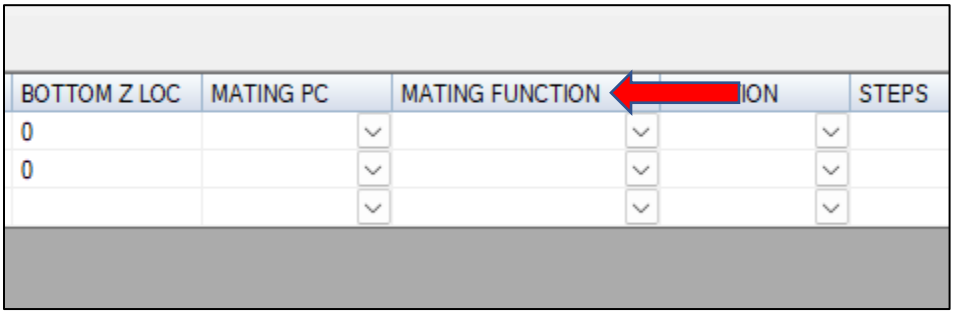

2. Added the option to have the Rhino Universal Drill Fabricate any RX and RY operations on the same plane as the value assigned.

3. Added additional fields to PRIMARY FABRICTIONS RULES to help define and apply specific fab rules in specific cases. You can now define the MATING PC and MATING FUNCTION.

4. Added additional fields to SECONDARY FABRICTIONS RULES to help define and apply specific fab rules in specific cases. You can now define the MATING FUNCTION.

5. Added the ability to remerge a RhinoFab Door Fabrication DAT file back into Door Fabrication using the IMPORT DATA button on the screen. If it is a file prior to this update you will need to enter the DOW and DOH with or without the gaps.
